Mobile: +91-9154691315

SKILLS

- **Programming Languages** : Python, Java
- **Web Technologies** : HTML, CSS, JavaScript, Responsive Web Design
- **Machine Learning** : Supervised & Unsupervised Learning TensorFlow, Scikit-learn, Pandas, NumPy
- **Tools & Platforms** : Git, GitHub, Docker, Vercel, Netlify, AWS / Google Cloud (Fundamentals)
- **Core Concepts** : Data Structures & Algorithms (DSA), Product Design, UI/UX
- **Soft Skills** : Analytical Problem-Solving, Leadership, Adaptability, Time Management

PROJECTS

hLPU – Student–Alumni Career Connectivity Platform: - [Link](#)

June '25 – Present

- Developed a full-stack web platform connecting students and alumni to facilitate mentorship, referrals, mock interviews, and verified job opportunities.
- Implemented stream-specific matching, dynamic job listings, to enable personalized career guidance and efficient opportunity discovery.
- Built an interactive and responsive interface with search, filtering, dashboards, and live status tracking to improve usability and engagement.
- Designed modular frontend components and integrated backend APIs for secure authentication, data handling, and scalable multi-user workflows
- Tech: HTML, CSS, JavaScript, React, Node.js/Flask, Web-Sockets

Traffic Volume Prediction: - [Link](#)

March '25 - April '25

- Targeted future traffic forecasting and congestion analysis across major Bangalore road networks for informed traffic planning.
- Executed extensive preprocessing, feature engineering, and EDA on temporal and traffic variables; applied K-Means and PCA across 8 areas and 16 intersections; constructed regression and ARIMA models with visualizations using Plotly and Matplotlib.
- Achieved improved accuracy in forecasting traffic trends and travel time indices, enabling actionable insights for intelligent traffic control and congestion reduction.
- Tech: Python, Pandas, NumPy, Scikit-learn, ARIMA (Stats-models), K-Means, PCA, Matplotlib, Plotly

TRAINING

Modulation & Signal Processing Training: - [Link](#)

June '25 – August '25

- Completed hands-on training focused on analog and digital modulation techniques including AM, FM, PM, ASK, FSK, and PSK.
- Gained practical experience in generating signals, applying noise, and analyzing modulation–demodulation processes.
- Worked on waveform visualization, bandwidth analysis, and frequency-domain interpretation using Python signal-processing libraries.
- Training emphasized understanding real-time communication concepts, signal behavior, and practical implementation using scientific computing tools.

CERTIFICATES

- Infosys Springboard - ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM - [Link](#) August '25
- Udemy – Master Generative AI & Generative AI tool - [Link](#) August '25
- Center for Professional Enhancement- AI & ML for Real World Problem Solving. - [Link](#) July '25
- Responsive Web Design Certificate – FreeCodeCamp - [Link](#) November '23

ACHIEVEMENTS

Achieved Gold Coder on Hacker Rank:

August '24

- For consistent performance in **Java and Problem-Solving** challenges.

Secured Top 10 Rank:

April '24

- Among 400 participants in Hackathon Competition.

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; CGPA: 7.56

Punjab, India
August '23 - Present

Sri Saraswathi Educational Institution

Intermediate; CGPA: 8.0

Andhra Pradesh, India
April '23

Bhashyam Public School

High School; CGPA: 10.0

Andhra Pradesh, India
March '21
